Universal health coverage (UHC) means provision of quality services to everybody without discrimination of any kind and without exposing people to financial hardship. UHC is one of the targets of Sustainable Development Goal 3, and attaining UHC will also contribute directly or indirectly to achieving the other SDGs. Achieving UHC means ensuring healthy lives and promoting well-being for all at all ages with explicit affirmative action for vulnerable populations including refugees and migrants. Thus, disaggregated data will be necessary to assess and address inequities in health. UHC requires inter-sectoral action. All countries can and must advance towards UHC by year 2030, if not earlier.
