

## HIGHLIGHTS

- The cumulative number of cholera cases reported in Yemen since October 2016 is 468 993 including 2 050 related deaths with a case fatality rate of 0.43%. The country experienced a second wave of this outbreak during the month of April and from 27 April to 31 July 2017, the total number of reported cases of cholera at 443 166 including 1 921 related deaths with a case fatality rate of 0.43%.
- During the month of July 2017, the Ministry of Public Health and Population of Yemen reported a total 183 370 cholera cases including 302 associated deaths (CFR- 0.2%).
- Although at country level the number of cases has declined for the 5th consecutive week, trends at governorate level show that transmission has plateaued in four governorates (Amanat Al-Asimah, Al-Hudaydah, Amran, and Dhamar). An increased trend has been observed, though, in Hajjah, Lahj, and Mokla governorates over the previous 3 weeks.
