As mentioned in my letter to the editor in your March-April 2008 issue, I have collected several sets from the ‘Anatomy Charts of the Arabs’, a collection of drawings described by Karl Sudhoff approximately a century ago. This is the first chart (the skeleton) of the set of four ‘Anatomy Charts’ found in a 264-folio illustrated manuscript [N° “500-510/...Ah/1110/n14” in The Sami I Haddad Memorial Library - Rancho Palos Verdes Branch and N° “90” in the Catalogue of the Arabic medical manuscripts in the Library of Dr. Sami Ibrahim Haddad Farid Haddad and HH Biesterfeld (Aleppo 1984)]. Parts of the texts were written in Arabic and other sections in Persian. The scribe was either ḵalīl b. Ṣawāḥ b. ẓawr b. ḥanīf or muḥammad b. ẓawr b. ẓawr b. ḥanīf; both are unknown physicians mentioned in the text. The copy was made in Putna, Behar, India sometime between 944 and 1110 AH. It has no title, but I gave it the following one “majmu’a Tibbīyya” because it is a series of extracts from previously written recognizable medical books.
