

Progress report on the review of the status of resolutions adopted by the Regional Committee during the period 2000–2019, and recommendations for sunseting and reporting requirements

Introduction

1. In October 2023, the 70th session of the WHO Regional Committee for the Eastern Mediterranean adopted resolution [EM/RC70/R.6](#) endorsing the recommendations made in document EM/RC70/14 with regard to the sunseting of 72 resolutions on strategies, frameworks and technical documents adopted by the Regional Committee during the period 2000–2017.
2. Resolution EM/RC70/R.6 also requested the WHO Regional Director to: ensure that requirements for reporting on the implementation of resolutions are clearly defined; propose, for each resolution, specified reporting years to the Regional Committee; consider the entire proposed lifespan of a resolution when advising the Regional Committee of its technical, administrative and financial implications; and revisit active resolutions resulting from the exercise and submit a detailed report to the 72nd session of the Regional Committee.
3. This report summarizes the progress made in reviewing the status of resolutions adopted by the Regional Committee during the period 2000–2019, including recommendations for sunseting and reporting requirements.

Earlier regional exercise

4. The process of reviewing resolutions falls under the terms of reference of the Programme Subcommittee of the Regional Committee, which monitors the implementation of the recommendations and decisions of the Regional Committee.
5. Tracking and monitoring the implementation of time-bound resolutions is part of the Secretariat's implementation plan, as recommended by the Agile Member States Task Group (AMSTG).
6. In 2013, as part of the resolution audit and monitoring process, and in line with the WHO reform (EB132/5 Add.6 and A66/4), the Regional Committee for the Eastern Mediterranean initiated a process of review of resolutions endorsed by the Committee during 2000–2011.
7. This review of the status of implementation of resolutions of the Regional Committee was the first ever conducted and resulted in the sunseting of most resolutions endorsed in the years under consideration (60% of the adopted 134 resolutions from 2000 to 2011).
8. In 2023, the Regional Committee conducted a second review of resolutions it had endorsed during 2000–2017. In total, 126 resolutions were examined, including operative paragraphs embedded within the Regional Director's annual resolution. As a result, 72 resolutions were sunset and 54 remained active under the continuation of their mandate.

Methodology of current exercise

9. A thorough review of adopted Regional Committee resolutions from 2000 to 2019 was undertaken, building on the exercise conducted in 2023.
10. Resolutions were classified into the categories of sunset or active, according to a set of predefined exemption criteria, if the resolution exceeded six years of age.

11. The criteria for exceptions to the six-year limitation on reporting, as proposed in Executive Board document EB148/33 on WHO reform: governance, considered in decision EB148(9), included:

- reporting related to ongoing efforts for the eradication or elimination of diseases, such as poliomyelitis and dracunculiasis;
- standing items on the agendas because of their strategic relevance to the governing bodies, such as the implementation of the International Health Regulations (2005), smallpox eradication: destruction of variola virus stocks, the Infrastructure Fund, collaboration within the United Nations system and with other intergovernmental organizations;
- the alignment of reporting with the duration of an existing strategy or action plan.

12. Resolutions were sorted by pillars that reflected WHO's global and regional strategic priorities (advancing universal health coverage, addressing health emergencies, promoting healthier populations and transforming WHO).

Results

13. As a result of the analysis, 84 resolutions were examined, including operative paragraphs embedded in the Regional Director's annual resolution. It is proposed to sunset 19 resolutions and keep 65 under continuation of mandate with a possible revisit within two years' time for reassessment. The recommendations for sunset, including criteria for exemptions, for each of the 84 reviewed resolutions are provided in Annex 1.

14. The following table details the results by department of the WHO Regional Office:

Department/unit	Number of resolutions	Active	To be sunset
Business Operations	2	1	1
Communication, Resource Mobilization and Partnership	1	1	–
UHC/Communicable Diseases	9	8	1
Director, Programme Management	1	–	1
Healthier Populations	12	8	4

Polio Eradication	2	2	–
Science, Information and Dissemination	6	3	3
UHC/Health Systems	23	20	3
Health Emergencies	9	9	–
Total	84	65	19

15. The following table details the results by pillar:

Pillars	Number of resolutions	Active	To be sunset
Pillar 1	32	28	4
Pillar 2	11	11	0
Pillar 3	30	21	9
Pillar 4	11	5	6
Total	84	65	19

The way forward

16. The Secretariat should continue to ensure that all resolutions and decisions on strategies, frameworks and technical documents proposed by the Secretariat to the Regional Committee have clear reporting cycles as well as end dates, where appropriate. Where possible, a mid-term review should be clearly specified. When a resolution or decision is proposed by a Member State, the Secretariat should provide the same guidance to the proposers.

17. All final progress reports to the Regional Committee should indicate whether reporting on the resolution or decision relating to a strategy, framework or technical document will be sunset or subsumed into reporting on a new mandate on the same or related subject matter. If reporting is to be subsumed, even before the end date, it is recommended that this is done through the most recent resolution or decision with a similar mandate, and is specified in the final progress report.
